InfoTrack

Location Intelligence Solutions

A Group Company of Future Innovation Group (FIG), Japan

InfoVision
## Lets secure your assets

Introduction

InfoVision is a state-of-the-art MDVR based video solution which supports Critical Logistics, HazMat, High Valued Material Movement, Life Sciences and People Movement.
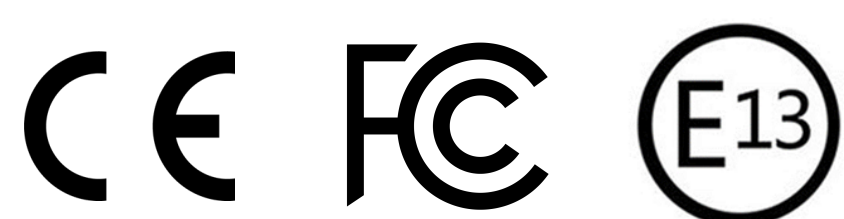

Software Features

- Tracking System with Live Video Streaming
- Monitor Mishaps and get Video Alerts for any Critical Events
- DMS - Driver Management System
- ADAS - Advanced Driver Assistance System
- Driver behaviour alerts - HA, HB, Overspeed etc.
- Multi Sensor Integration
- MIS Reports
- Web Portal and Mobile App (Android and iOS)

Hardware Features

- 4 channel and 8 channel variants
- Integrated DMS + ADAS
- SD Card and HDD Support
- On board voice alerts to driver
- I/O Support
- 3G / 4G / WiFi /G-Sensor built in

Certifications

CE FC E13

What is Mission Critical Logistics?

Critical Logistics is not just limited to goods movement, but also involves building trust and credibility leading to customer delight.

Critical Logistics involves movement of Hazardous Materials (HazMat), Bullion, Cash and High Net Worth Material, Life Science Medicines and People Movement.

Hazardous Material

HazMat movement by road is not only complex but also unsafe and dangerous. Material involves Chemical, Gas and Petroleum Products, Inflammable Materials etc.
Any mishap or accident can lead to several issues not limiting to substantial monetary loss but also life and time hurting credibility. Can technology support in minimising this?

Bullion, Cash and High Net Worth Logistics

High Security is the buzz word here as this involves Jewellery, Cash and similar material movement. Any mishaps of theft leads to hefty financial losses including Life and Credibility.
Can technology support in minimising this?

Life Sciences Logistics

Time Critical Life Science Logistics will involve materials like Bio Samples, Stem Cells, Blood Samples and Animals in some cases. Time Based Logistics with Temperature Control and LIVE video streaming play a vital role in On-time delivery, any delays lead to Deterioration and Decay leading to heavy losses and also effects the credibility.
Can technology support in minimising this?

People Logistics

People movement through commercial vehicles like Student, Employee, Patient Transportation, Prisoner Movement etc. is a norm of today's People Logistics, but often we see dangerous mishaps like rapes, molestations, murders, kidnapping and negligence leading to unrest in society.
Can technology support in building peaceful and safe society?

InfoVision is a comprehensive solution with Integrated Video Monitoring, Live Video Streaming, Alerts and Analytics which help in addressing all the above concerns to a large extent.

Solution Advantages

	Feature	Benefit
1 Driving Behaviour Alerts	• Harsh Braking, Harsh Acceleration and Over-speeding • Driver Fatigue and Distraction • Exceeding Drive Hours • Accidents and Analysis • Driver Identification and Management	• Taking action against negligent drivers, improve vehicle life-cycle • Identifying tired drivers, mobile usage and other distraction • Identify excess driving and take appropriate measures • Accident re-creation for detailed analysis, fault identification / FIR filing • Details of person driving • Driver management including Training, Driver Score and Rewards • Reduction in mishaps, accidents for a better ROI
2 Vehicle Management Alerts	• Over Stoppage • Unauthorised Stops • Excessive Idling • Geofence Entry/Exit • Fuel Management • Towing • Route Deviation	• Identifying vehicles stopped for more than specified time • Identifying unauthorised stoppages • Alerts if ignition is off and vehicle not moving • Automated information of entry and exit helps in better planning • Alerts for Low Fuel, Draining and Filling with volume • Any movement when ignition is off, necessary action can be initiated • Alerts on deviation from designated route, helps in taking appropriate action
3 Other Alerts	• People Pickup/Drop • Panic / SOS Function • Immobiliser • Documents Expiry • In Vehicle Live Video • NPA • Sensors (Door, AC, Seat Belt etc.) • Temperature • Campus Entry/Exit • People In/Out	• Embarking and Dis-embarking alerts • Panic / SOS alerts during travel minimises mishaps and increases safety • Disable starter motor if any mischievous activities using immobiliser • Driver / Vehicle documents expiry alerts helps in vehicle safety • Live video of cabin can be viewed (Driver and Passenger Area) • Possible "Non-performing" vehicle data helps in better management • Alerts for Door Open / Close and Seat belt Lock / Unlock • Temperature variation alerts help in better management of perishable goods • Alerts for Vehicle Entering / Exiting Campus / Work Place and also People Embarking / Dis-embarking
4 Other Features	• Live Tracking and Video • Web Application and Mobile App (Anroid / iOS) • ETA • Customisable MIS Reports • RSA and RSR Feature	• Real-time status of all vehicles with time and location • View vehicles on both satellite view and map view • Have accurate reports on utilisation of vehicles • Set a geo-boundary and get notified if vehicle moves out of the boundary • Forecast of vehicle arrival time helps in better utilisation • Web and Mobile apps enable user to monitor from anywhere anytime • User access security confines information to authorised staff only • Detailed real-time reports, can be customised according to requirements • Link to get assistance when there is any issue with vehicle during trip
5 Mobile Apps	• Manager App • Driver App	• Live Tracking and Live Video • Call Driver • Picture upload for any Issues/Mishaps • Emergency Number Connectivity
